Maxcis Partners With Alignetworks

In our continuing efforts to control medical costs for our MADSIF members, we have partnered with Alignetworks. Alignetworks is a national network of physical therapy providers with over 500 locations in Michigan. By using the network, we will have more control over the extent of physical therapy visits as well as save up to 25% of P.T. costs. When physical therapy is prescribed, our adjusters will work with out claimants to find a location nearest them. If there are any questions about the program, please contact Maxcis. Feedback is always welcome.

Special points of interest:

- Controlling Medical Costs
- Save up to 25% of P.T. Costs

NOTE: Occupational Health Partners (Concentra) does not participate in the network.
